

Topic of the month:  
**El Niño &  
Dengue Fever**

Join us for our monthly NDPTC Third Thursday meeting  
**and some Holiday Cheer!**

**THURSDAY, DECEMBER 17, 2015**  
**@ UH MANOA CAMPUS**

**PRESENTERS:**

**Owen Shieh**

Meteorologist, NDPTC Weather and Climate Program

**Dr. Sarah Park**

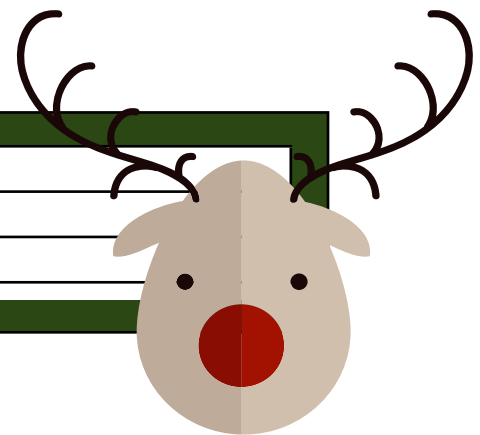

State Epidemiologist, Hawaii Department of Health, Chief of the Disease Outbreak Control Division

**Edward "Chico" Caballero**

EMS Instructor and Paramedic with the City and County of Honolulu & American Medical Response

As Hawai'i emerges from an unusually active and dangerous Central Pacific Hurricane Season, the focus changes from the sky to the air around us. The 2015-2016 El Niño kept its promise of a hurricane season full of dangerous storms and close calls, but now conditions are ripe for a different hazard, dengue fever. This month, join NDPTC staff to learn about the science of El Nino and dengue fever and how the Hawai'i Department of Health and emergency medical services are responding to the new threat across our island chain.

4:30	Early pupus - Saunders Hall Courtyard
5:00	Presentations - Crawford Hall 105
5:40	Networking and pau hana - Saunders Courtyard
